

We store employee data and their insurance papers

For employee we store their code, name, phone, address and department

For insurance papers we store Employment Contract (file), Q1Insurances (file), Q1InsurancesExpireDate and Q6Insurances (file) ,we renew this papers every year and upload the renew papers for each employee

- design database for this problem

- implement crud operation for insurance paper

- design a dashboard that represent two reports (employee who had completed insurance papers, employee who had uncompleted insurance papers)
